Disabling and Re-Enabling Advanced Security

You can disable the Advanced Security feature in xFi by navigating to More and selecting My Services. From here, select Disable under xFi Advanced Security and follow the on screen prompts.

Once disabled, you will lose 24/7 threat monitoring and real-time reporting on your home network.

It might take up to 10 minutes for changes to take full effect.

If you have disabled the Advanced Security feature, you can re-enable it by navigating to More and selecting My Services. From here, select Enable under xFi Advanced Security and follow the on screen prompts.
